

A man in a brown checkered suit and blue jeans is sitting in the driver's seat of a red car. He is looking down at a brochure he is holding in his lap. The brochure shows a red sports car and some technical details. The background is a blurred car dealership.

Monthly Payments

Wondering what your monthly payments will be?

We have provided this easy to use table to help give you an idea of your monthly payments per \$1,000 borrowed.

Simply choose the number of years you would like to borrow for, then the rate you are seeking. You will then see a corresponding number in the table. Multiply that number by the number of thousand dollars you intend to borrow.

For example, if you intend to borrow EC\$70,000, for 6 years, at an interest rate of 7% p.a., the corresponding number in the table will be \$17.05. Multiply $\$17.05 \times 70 = \$1,193.50$. Your monthly payment would therefore be \$1,193.50.
